Subject: Permit Application, 11-05-0012-P, Request for a Public Hearing

Three Lakes Association (TLA; Bellaire, Clam, and Torch Lakes) is very interested in learning more about this proposed project. We were pleased that Doug and Christine Davis took the time on Friday morning, September 9th for a tour of the site and to describe the project in more detail than described in the permit application. But since more time is needed to obtain answers to our questions, we are requesting that a Public Hearing be scheduled.

We are particularly interested in a storm water management plan for the site, which will include detention of storm water from the marina's impervious surfaces during an anticipated major rain event. We are also interested in the details of the integrated rain garden, and alternative locations for the creation of wetland abatement sites.

Sincerely,

Norton Bretz
TLA Executive Director
