Re: Notification of the Science Education Outreach Program (SEOP) Grant application period for the 2022-2023 school year

Dear Science Teacher,

The Three Lakes Association is excited to announce our Science Education and Outreach Grants once again. These grants will support science and nature experiences in the 2022/23 school year that get students interacting with the natural world and live human beings (not recordings), such as field trips, outdoor activities, and visits with experts. This grant can fund fees, equipment, or transportation to make these experiences possible. The grant application will open on May 1st, 2022 and runs until July 15th, 2022.

The SEOP Grant allows you to provide science students with an enhanced environmental science experience. Three Lakes Association is proud to offer this opportunity to all science teachers in the districts bordering our three lakes. We require that participating teachers and students report to our organization once during the school year and again at the end of the school year to tell us about the grant's experience. Suggested ways of reporting are included on the website. If you are not familiar with this program, please feel free to contact me directly and/or check out the information on our website.

The grant application and instructions are posted on the Three Lakes Association website, 3lakes.com. To apply, follow the links at the website under Education Programs, where you will find information on the SEOP program and access the grant application and feedback agreement. Please apply online.

Feel free to contact me with any questions.
